Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Allison et al (5,59,110).

Allison et al teach an apparatus for forming concrete blocks, comprising a mold box (100), an underlying pallet table (78) for supporting a pallet (80), a frame (20) supporting a drive member (124), which connects to the mold box and the pallet table; and means (130, 135, 142, 144, 74, 76) for causing the individual reciprocating movement of the mold box and the pallet table.

3. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Braungardt et al (5,846,576).

Braungardt et al teach an apparatus for the production of shaped bricks, comprising a mold box (3), and an underlying pallet table (1) for supporting a pallet (26), a frame (18) supporting a drive member (20), which connected to the mold box (3) and the pallet table (1) and constituting means for individually moving the mold box and the pallet table toward and away from each other (col. 4, lines 16-24).

Allowable Subject Matter

4. Claims 2-4 are allowed over the prior art of record.

Art Unit: 1722

5. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest that the drive member includes a drive shaft and first and second connectors; in which the first connector extending between the drive shaft and the mold box; the second connector extending between the drive shaft and the pallet table; wherein the drive shaft including a first eccentric means engaged to the first connector, and a second eccentric means engaged to the second connector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

6. Applicant's arguments filed October 27, 2003 have been fully considered but they are not persuasive.

7. The Applicant has argued that the cited prior art teaches separate driving devices for driving the pallet table and the mold box. The claims, however, do not limit to a single driving device that would be able to drive both the pallet table and the mold box. Instead, claim 1 cited that the drive member constituting means for causing the individual reciprocating movement of the mold box and the pallet table. Therefore, the claims are still anticipated by Allison and Braungardt.

In regard to claim 5, the Applicant asserts that none of the prior art discloses that the mold box and the pallet table are reciprocating while vibrating. However, the operation of the

Art Unit: 1722

machine does not determine patentability of the apparatus claims. Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. In re Danly, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "[A]pparatus claims cover what a device *is*, not what a device *does*." Hewlett- Packard Co. v. Bausch & Lomb Inc., 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990). (Emphasis in original)

Claims 2-4 are allowed for the reason set forth in the previous Office Action.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
